Hi Rob! Yes, I have access to everything, and yes, I can attend the call next week! Just send me the invite. Thanks!

Hi Rob,

You are welcome to pick my brain (though sometimes it's slim pickings). The links for the sharepoint and GIS viewer worked for me when I looked at them yesterday. I am on vacation next week so will not be able to participate in the call- go ahead and invite me (as I might have to come in on Wednesday- for a RP meeting-but I am planning to not be here Wednesday). Is there a site charge number for us non-Region 8 people? I have access to the Gold King Response removal number that was set up for the response action-but not any other numbers. I am pretty swamped until after October 1- but am going to do my best to keep up with meetings, and discussions- heavier lifting on my part will have to be after the NPL rule (I have 4 sites-and one very industrious RP who is trying to get his site removed from the proposal rule) and GPRA commitments are met. Hopefully things will lighten up and I can provide more support (if needed) after October.

Hi Jennifer, Terry and Brenda –

Thanks for the discussion yesterday on Upper Animas. I want to check in with you on a couple of things.

First, I want to make sure that you all have access to the Sharepoint site from Paula Schmittdiel and the SADIE tool and GIS viewer from John Wieber. You can find the recent (2012-2015) SAPs and Analytical Reports on the Sharepoint site. Separately, using the SADIE tool, you can search through the previous SCRIBE projects and import any selected data into the GIS viewer. We just received a brief tutorial on the tool this morning and it seemed fairly intuitive in regard to searching through the database and mapping it into the GIS viewer. I'd be happy to help out if you think this would be something you'd like to use.

Second, I've scheduled a meeting for next Wednesday (10am-11:30am, MT) to discuss data needs within Mineral Creek. The purpose of the meeting are to identify the key sources within Mineral Creek and discuss the options and logistics for sampling Mineral Creek. Let me know if you would like to join the discussion and I can send out the meeting info and set up a conference line. Regardless, I'll plan to keep you in the loop as we move forward.

Thanks again. Let me know if you have any questions or concerns.

Thanks,

Rob
